Fresh organic fruits and vegetables contain more nutrients, antioxidants, vitamins and minerals. They taste better too. Organic fruits and vegetables are grown without chemical and petroleum-based pesticides, herbicides, and fungicides, nor sewage- or sludge-based fertilizers be used. Organic products are free from Genetically Modified Organisms (GMOs), hormones, antibiotics, and cloning. Organics are better for people, our planet, and our future. Join us in making the world a better place, one organic bite at a time!

Annie's Organic Buying Club

making organics affordable for everyone!

A buying club is a group of people who pool their money to create purchasing power to buy food at drastically discounted prices. We order in bulk direct from manufacturers, vendors, farms, and distributors saving us money and lowering our carbon footprint on the planet.

We are primarily an Organic Fruit and Vegetable Buying Club focusing on local organics, but we are able to get other items as part of our group, making it more affordable to choose organic products over pesticide-laden conventional items every day. Join the Club - it's easy!

1. Let us know you are interested! Call, email or visit our site to sign up.
2. Choose a full or half-share. Box examples are on our site. You even get to help decide what will be included in your box each time!
3. Choose the weekly or bi-weekly option.
4. Choose the closest location for you to pick up your box or become a *Buying Club Coordinator* and make your own pick up spot!
5. Revel in your bountiful box of the freshest organic produce. Preorder any extras you want for your next pick up including:
 - grass-fed milk (even non-homogenized milk!)
 - yogurt, cheese, other dairy
 - organic nuts & seeds
 - organic dried fruit
 - freshly prepared vegan & vegetarian meals
 - hummus, dips, juices, snacks
 - organic brown or white eggs from free roaming hens
 - fresh organic poultry, even kosher organic poultry!
 - organic grass-fed meats
 - so much more!
